

Low Speed Precision Cut-off Machine

- ★ LCM25 applies to cut all kinds of hard materials, especially for cutting high-value fragile crystals.
- ★ This machine can be equipped with diamond or other resin material cutting blade in order to meet the various requirements for samples cut-Off.
- ★ It has many types of clamps which make the work piece cut at the optimum position.
- ★ Limiting switch can process without the supervision, spindle runs precisely, and adjust the level of objects.

Specification

Travel of movable frame: 25 mm

Blade diameter: $\varnothing 100 \sim \varnothing 150$ mm

Positioning precision: 0.01 mm ;

Blade speed: 0-600r/min;

Power: 50W, 1P~220V/110V, 50/60Hz

Dimension: 350×300×200 mm

Weight: 18.5 kg
