

■ ■ Metallographic Sample Manually Mounting Press

MMP22/30/45 is used to reshape irregular shape and size of metallographic sample which is difficult to hold so as to cut or polish the samples, then be tested and measured in metallographic photo or hardness test.

This machine is controlled by digital temperature controller and timer, after finishing mounting, it will turn off automatically.

It is the ideal equipment in the tertiary institutions, industrial's laboratory.

Model	MMP22	MMP30	MMP45
Sample diameter	Ø22×15mm	Ø30×15mm	Ø45×18mm
Heater specifications	220V, 650W		
Temperature setting range	0-180 °C		
Power	1P~220V, 50Hz		
Dimension	340×270×400mm		
Weight	33 kg		
Accessory	Heater, Mounting raw materials, hopper
