

## UV Notching Machine

This machine is designed for providing the specimens used in the impact testing tasks.

Notching may cut notch on the specimen for only one go of the cutter. Besides, it has advantages of high precision, long life, low noise and concise appearance etc.

The Notched samples fulfill the test standard of ASTM E23 and ISO148.

### Specification

Model	UV-1H	UV-2D	UV-2P
Notch type	U or V type	U and V type	
Cutter	Single	Double	Double
Drive method	By hand	By motor	By hydraulic
Cutter hardness	72-75 HRC		
Notch stroke	340mm		
Notch speed	Manually control	2.5m/min	2.0m/min
Size of specimen	10mm×10mm (7.5 or 5mm as special)×55mm		
Power supply	None	3phase, 380/220V, 50/60 Hz	
Machine size	600×500×1200mm		
Weight	120kg	150kg	200kg
