

Aluminium Oxide Nano Powder Al₂O₃ Alumina Nanoparticles For Powder Coating

Specification of Al₂O₃ powder:

Particle size, 200-300nm

Purity: 99.99%

Application in powder coatings:

- 1 Reduce static charge generation;
- 2 Improve the fluidity of the powder;
- 3 Improve processability in the extruder;™
- 4 Avoid moisture absorption and prolong storage stability;
- 5 Increase rheological properties and corner coverage on the substrate.
